DIAMOND VALLEY "B" ARRIVAL END PROJECT

FINAL DRESSING OF POSTS 10 & 10B

Effective from Sunday 15th May 2011, Posts 10 & 10B have all dolls in place and the posts are dressed to their final arrangement. Post 10 applies to the Up Through line and Post 10B applies to the Up Local line. The dolls apply to routes as follows:

Crews are required to understand and learn the route applications for all dolls, and be alert for conflicting indications between Posts 10 & 10B. Per the Rules, trains must stop on **BOTH** lines should a conflicting indication be displayed on **EITHER** post.

Dolls D2, D4 and D5 are worked via the interlocking in Diamond Valley "B" signalbox. Dolls D1 & D3 (to Platform 1) are worked via local manual switches in the adjacent relay cabinet. Trains will be signalled to Platform 1 by a hand signaller until further advised.
