Signal Relocation and Installation of new signals Rocla Tunnel Area

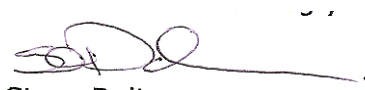

On Friday the 27th February 2009, Automatic signal DV225 at the entrance to the Rocla tunnel was abolished. A new L.E.D. type **Home Signal** with an Illuminated letter 'A' numbered DV225 has been installed approximately 3 meters in the down direction on the opposite side. This work is in conjunction with the new passing loop.

In addition to the above, a new T Bracket signal post has also been installed at the Pine Creek end of the loop, with two home signals **FIXED AT STOP** for reverse running traffic only. Signal numbers will be allocated to these signals at a later date.

ALL CONCERNED TO NOTE AND ARRANGED ACCORDINGLY

Bruce. N. McCurry
