### CHANGES TO SIGNALLING INFRASTRUCTURE :

On the date shown hereunder, the following changes have been made to the signalling infrastructure:

#### NILLUMBIK

On Wednesday, 29<sup>th</sup> August, 2007, between the hours of 1000 hours and 1600 hours, the following work was carried out :

1. The throw was altered on the specially modified "Wsa" type hand point levers fitted to both ends of No.53 Double ended Points so they may be operated by hand from the "Normal" to the "Reverse" position during after hour periods.
2. The specially modified "Wsa" type hand point lever was restored for No.55A Double ended Points and the throw was altered so they may be operated by hand from the "Reverse" position to the "Normal" position during after hour periods.

Note: No.53 Double ended points are fitted with "STP" Padlocks and Chains.

The hand levers must be locked in the **lowered position** during the hours of public passenger operations and only unlocked after passenger trains cease for the day.

The crew operating the Signal Train are to give this matter their close personal oversight.

-----

ALL CONCERNED TO NOTE AND ARRANGE ACCORDINGLY.

*Bruce. N. McCurry,*  
**Signal & Telegraph Sup't,**
