3rd May, 2006..

BOOK OF REGULATIONS & OPERATING PROCEDURES.
(Red Cover)

Commencing forthwith, the following amendment to the Book of Regulations & Operating Procedures 2004 will become effective :

REGULATIONS PERTAINING PARTICULARLY TO SAFEWORKING :

50. WORKING SIGNAL BOXES DURING PUBLIC RUNNING :

Insert the following additional new sentences to Regulation 50, Clause (b);

(b) WORKING OF CONTROL PANELS :

Signallers are reminded to operate Signal Control Panels in the manner described in the Book of Regulations and Operating Procedures in order that derailments, damaged points, collisions and wrong routes are minimized.

Signallers operating Unilever type Signal Control Panels provided at locations such as Diamond Valley "B" & Meadmore Junction must not operate any point lever unless the "points availability" light is displayed.

Signallers must observe that the points "Normal" or "Reverse" indication lights are in the position required for the intended movement prior to operating the applicable signal levers.

The practice of pre-storing movements on these types of Signal Control Panels is irregular, is not approved by the Signal & Telegraph Branch, and is contrary to the Book of Regulations & Operating Procedures.

Kindly insert the above amendments to Page 41 of the Book of Regulations and Operating Procedures - 2004.

ALL CONCERNED TO NOTE & ARRANGE ACCORDINGLY.

Bruce. N. McCurry,
Signal & Telegraph Sup't,
