

## *Sandown 2011*

DVR participated in the 2011 Sandown Model Railway Exhibition. This year we displayed two locos that have never been to DVR ! We had Robert Griffith's Blue&Gold "B" class shell, and Andrew Mierisch's under construction A66. A debut for all to see in fact of both locos.

Along with the TV and computer slideshow and the black viewblocks, Our display made the most of the three by five meter space allocated. Our trains sure dwarfed anything around them ( which is important to us to show size and purpose apart from the "model trains"

We also had three signals specially made for exhibition purposes by Gary George. They sure did shine on others , the level crossing wigwag certainly attracted a lot of people.

The first two days were spent promoting the Night Run. Then just the railway normally on the Monday (after a long night at DVR) - pickup went well and we were gone 45minutes after the show closed.

I would like to thank Andrew Mierisch, Robert Griffith, Paul Gillard, Gary George, Gloria Gallacher, Ron Roberts, Paul Gallacher,

David Head
